

OSU RESEARCHERS LOOK TO STOP PHOSPHORUS AT THE EDGE OF THE FIELD

Phosphorus that accumulated in agricultural soils years ago continues to pose a challenge for water quality in the Illinois River Watershed. Drs. Jaime Schussler and Mary Foltz are working to develop a way to capture that nutrient before it reaches waterways.

NSF EPSCOR GRANTS FUEL RESEARCH IN CLEAN HYDROGEN, PRINTED ELECTRONICS

From tiny surfaces where catalysts enable clean hydrogen to cutting-edge electronics that could one day be printed directly onto aircraft, scientists are approaching major questions at different scales.

READ MORE

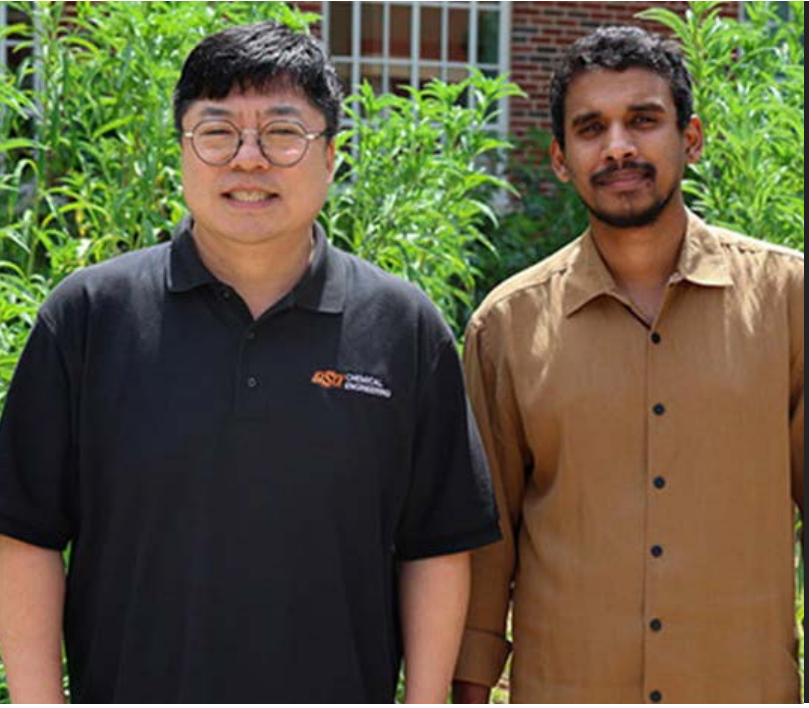

OSU RESEARCH COLLABORATION LOOKS TO ADVANCE SMARTER MULTI-MATERIAL 3D PRINTING

Few manufacturing technologies have revolutionized how products can be designed and produced as much as 3D printing. But researchers are looking to make the process smarter.

READ MORE

CHE RESEARCHERS INVESTIGATE NEW LITHIUM RECOVERY STRATEGY

Lithium has never been more prevalent in the world than it is today. With the continued rise of electric vehicles, electronic devices, renewable energy systems and batteries, the recovery of lithium is a big business.

RESEARCHERS DISCOVER NEW FUNCTION IN CATALYSTS

Researchers in the School of Chemical Engineering are challenging long-held assumptions about how catalysts work.

READ MORE

CIBS FOSTERS COLLABORATION BENEFITING OSU, HVAC INDUSTRY

The Center for Integrated Building Systems advances pre-proprietary research while faculty and students partner with industry.

READ MORE

IEM'S VO EARNS DISTINGUISHED GRADUATE FELLOWSHIP

Research is like a puzzle for Lucius Vo. Each piece represents part of the problem, and the challenge is figuring out how to complete it.

READ MORE

RESEARCH SHEDS NEW LIGHT ON EXTREME RAINFALL ESTIMATES USED FOR DAM SAFETY

How much rain could possibly fall during the most extreme storm – and how should engineers prepare critical infrastructure for it?

READ MORE

WHAT'S NEXT FOR OSU UNDER THE NEW FIVE-YEAR STRATEGIC PLAN?

Students, faculty and staff from across the OSU System gathered at the ConocoPhillips OSU Alumni Center to celebrate the launch of a new five-year strategic plan designed to enhance the student experience, expand the impact of research and discovery and strengthen OSU's service to Oklahoma.

UPCOMING SPEAKERS

CEAT
SEMINAR SERIES

OCTOBER

OCT. 2, 10AM (AG HALL 207)
DR. DANIEL ADAMSON - BAE
An honest look at early career building program. Bridging research and extension to reach producers in 2026

OCT. 5, 5:30PM (WWC 111/112)
LARRY ROONEY - CET
Construction Engineering Technology Industry Week

OCT. 9, 11AM (HRC-153/ZOOM)
DR. SANDIP HARIMKAR - MMME
Three effects and spark plasma sintering of amorphous alloys: Applications in advanced materials manufacturing

OCT. 20, 3PM (EN 450)
RON "BUDDY" BAYER - ZINK CENTER
AI has a backbone and it's not artificial: How service providers connect, secure and power the next generation of intelligence

OCT. 2, 3PM (ARCH 170)
DR. TARYN BAYLES - CHE
Creating pathways to engineering through curriculum, outreach and teacher professional development

OCT. 6, 3PM (EN 450)
DR. FERNANDO V. LIMA - CHE
A process operability-based framework for design, optimization and control of modular energy systems

OCT. 13, 3PM (EN 450)
DR. HAE-KWON JEONG - CHE
From interfacial design to molecular sieving: Zif-based mixed-matrix membranes for propyle/propane separation

OCT. 20, 5PM (ES 140)
MITCH MYERS - ZINK CENTER
An engineer's journey to becoming a serial entrepreneur

OCT. 28, 5PM (ARCH 170)
ERIC LONG - ARCH
Structure: Art and architecture
